

# WELCOME TO THE FUTURE

ZERO-EMISSION DELIVERIES

# URBAN LOGISTICS REIMAGINED

## GNEWT STANDS FOR GREEN NEW TRANSPORT

**Gnewt stands for Green New Transport and we have the UK's largest 100% commercial electric vehicle fleet, delivering zero-emission final mile logistics for retailers and third party logistics companies.**

Our 70 strong electric fleet includes tailor-made double load capacity vans and our bespoke smart charging infrastructure is the largest in London powered by green energy from sustainable sources.

Gnewt have been pioneering in the sector for over a decade. We have transformed the way green deliveries are made and continue to innovate in our routes across London and expansion plans for other cities.

**THE UK'S LARGEST ALL-ELECTRIC FLEET, WITH ROUTES ACROSS LONDON AND EXPANSION PLANS FOR OTHER CITIES.**

# WHAT MAKES US DIFFERENT?

LAST 10 YEARS  
**TO NOW**

---

**+800,000**  
EMISSION FREE  
MILES DRIVEN

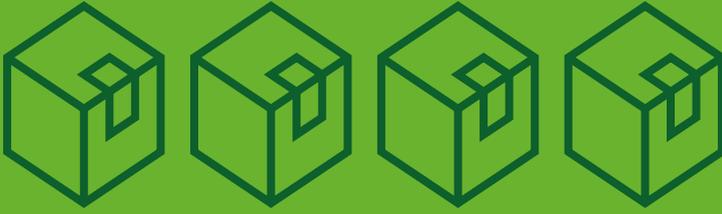

---

**475.2**  
TONNES OF  
CARBON SAVED

IT'S ABOUT FOUR AND A HALF TIMES  
AS HEAVY AS A BLUE WHALE.

---

**+10 MILLION**  
PARCELS DELIVERED ALL TIME

**NON-PVC  
LIVERY**

**100%** ELECTRIC  
COMMERCIAL  
FLEET

ABILITY TO TRUNK  
FROM ANYWHERE  
IN THE UK  
TO GNEWT IN  
LONDON FOR  
ZERO-EMISSION  
FINAL MILE

**TRACK &  
TRACE PLUS**

WE'LL NOT ONLY TRACK AND TRACE,  
WE WILL TELL YOUR CUSTOMERS  
IT'S A ZERO-EMISSION DELIVERY -  
INDUSTRY FIRST

# THE URBAN LOGISTICS CHALLENGE

A multi-faceted challenge to tackle:

1. Regulations
2. Carbon and Pollutants
3. Congestion

## CARBON & POLLUTANTS

People aged under 11 years old are exposed to 30% more toxic pollution than their parents. Cities and governments are now taking action with some adopting Low Emission Zones (LEZ), London's Ultra Low Emission Zone (ULEZ) and Clean Air Zones (CAZ) as measures to reduce exposure to air pollution.

Pollution can come from emissions, along with churning up road dust during braking and rubber-tyre particles.

## CONGESTION

In addition to the obvious issues with pollutants, cities are looking to tackle congestion with fewer vehicles, covering fewer miles. For logistics companies congestion adds complexities in finding a safe place to stop and make a delivery.

---

LET GNEWT BE  
THE SOLUTION

---

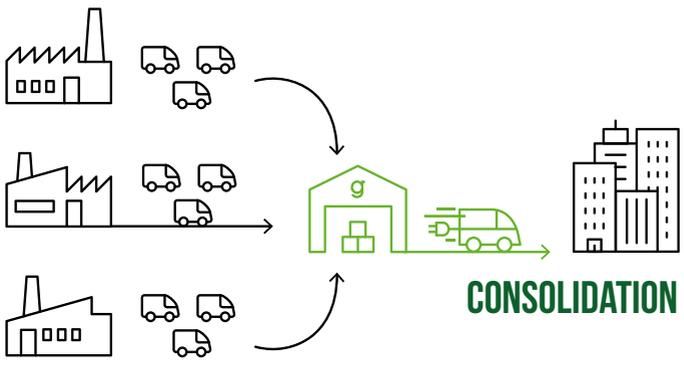

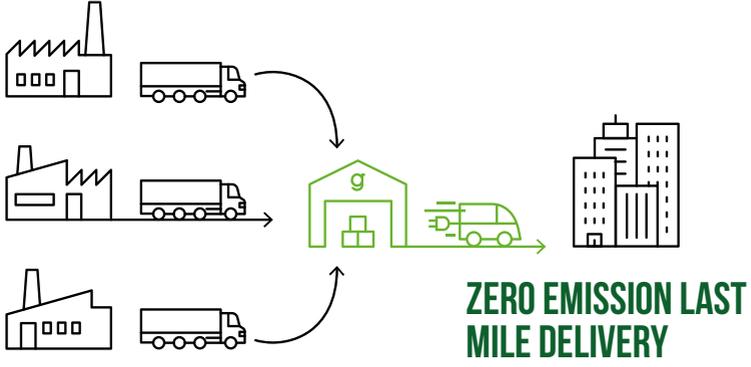

# DISRUPTING THE LOGISTICS SPACE

## YOUR CARBON NEUTRAL FINAL MILE PARTNER

**Use both traditional trunking and an emission-free last mile delivery in dense urban areas which are highly congested.**

We have capacity that allows us to meet the soaring demand for electric deliveries, driven by; consumers, a desire from companies to lead the green agenda and a need for firms to migrate to low-carbon deliveries as Ultra Low Emissions (ULEZ) and Clean Air Zones (CAZ) come into force.

## OUR VANS

**Our custom-designed electric vans make up a fleet of more than 70 vehicles.**

Gnewt has worked with Nissan and Drive Electric to develop the customised e-NV200 electric vans with the vehicles having a greater capacity without compromising on pay-load to meet rapidly growing demand for electric-van deliveries from consumers, e-tailers, parcel carriers and couriers.

**“GREATER CAPACITY WITHOUT COMPROMISING ON PAY-LOAD TO MEET RAPIDLY GROWING DEMAND FOR ELECTRIC-VAN DELIVERIES FROM CONSUMERS, E-TAILERS, PARCEL CARRIERS AND COURIERS.”**

The van modifications have been made after working with The Mayor of London with funding secured from Innovate UK. The vehicles’ efficiency is optimised through composite materials used internally and a fibreglass roof which doubles the pay-load whilst maintaining structural integrity and without increasing the weight. The electric motors are not only zero emission, but the reduced necessity for braking means the release of fewer pollutants from rubber tyre micro-particles and churning up of road dust, all of which are contributors to poor air quality.

## CASTING A WIDER NETWORK

Trunk from your DC with a zero-emission final mile process:

1. Collect from your DC
2. Trunk to London depot
3. Sort parcels in London depot
4. Load vans
5. Deliver
6. Reset returns for automatic redelivery the next day

## TRACK AND TRACE SOLUTIONS

Customers have access to:

- Live track and trace
- Text notifications
- Email notifications
- Proof of Delivery (POD)
- Automated redelivery
- Confirmation of Green Delivery

## THE PIONEERS

**Gnewt runs final-mile deliveries across the Capital for clients.**

"City Hall is proud to work with firms like Gnewt which are changing the way logistics deliver for the better, allowing companies to operate sustainably without compromising on service."

*Shirley Rodrigues,  
Deputy Mayor of London*

"ASOS is a highly innovative brand with social responsibility and sustainability at heart. Air pollution is a major issue in London with the legal air pollution limit being reached just one month into this year. We are committed to engaging with new technology and innovative logistics solutions to meet our customers' high expectations of the brand. We have found the perfect partner in Gnewt by Menzies Distribution and are delighted that we are the first retailer in the UK to deliver zero emission final mile in the central London Congestion Zone."
